

DEVELON

Ready your heavy construction equipment for spring

Follow this recommended spring maintenance checklist to ensure that your DEVELON equipment is ready for the work season. Before operating the equipment, perform the following maintenance:

- > Remove all grease from the hydraulic cylinder rods.
- > Add grease and oil at all lubrication points.
- > Adjust fan and alternator belt tension.
- > Connect the charged battery.
- > Check the condition of all hoses and connections.
- > Check the levels of engine oil, fuel, coolant and hydraulic circuit oil. If there is water in the oil, change all the oil.
- > Change all filters.
- > Inspect for signs of nests (e.g., birds, rodents).
- > When starting the engine after long-term storage, follow the "Hydraulic Oil Warm-up" procedures listed in the manual.

You can find more information about parts and service on our website.

Contact your local **DEVELON dealer** to order parts or to speak to the service department.
