

DEVELON

We are DEVELON.

DEVELON has an 80-year legacy in construction equipment manufacturing. During our 25 years operating in North America, we've sold over 35,000 machines. But numbers don't define us — our real difference is in our approach.

Our sole focus is making machines that move the earth.

Unlike other dual-sector manufacturers that spread themselves thin across industries, we work exclusively in the dirt, timber and concrete to help everyone from residential contractors to large mining operations build our world.

We offer products for every task.

Our ever-expanding lineup of more than 50 excavators, articulated dump trucks, dozers, wheel loaders and compact track loaders ensure that our customers find the right-sized product for any application.

We're close to home and globally known.

With more than 180 North American locations, our dealers are close to the customers they serve. While we're still growing domestically, we're already a top-tier player in Asia, Europe, the Middle East, North Africa and South America. And as a brand of HD Construction Equipment, we have the resources, manufacturing footprint and supply chain to succeed for the long term.

We create purposeful innovations.

We lead the industry in designing technology that improves job site operations, input costs, safety and fleet management. From the first Transparent Bucket system to autonomous equipment to manufacturing our own fuel-efficient engines, we're building the future of construction today.

We drive added value for our customers.

Our equipment comes with leading 36-month, 3,000-hour standard warranty,* more standard premium features, timely parts and responsive service from dealers committed to protecting our customers' uptime.

And we'll never stop developing onward.
